Carlos Cabrera Gentile

Software Developer

Resume

I am a software developer, I have worked in many companies using different technologies, mainly JavaScript. I am very passionate about technology and learning new things.
I like meeting new people and learning about their experiences.

Professional Experience

Longevo • Welness and Fitness
Frontend Developer Jun, 2022 - Present
Working at the back office project, for experts and coaches to manage the customer status and health. Platform developed with React and Redux with REST services and NextJS. Also with Material UI and Styled Components.
Working as a team the UX designer provides us the design or prototype made in Figma. From there I take the colors, measurements, fonts, breakpoints, images, etc.
I also give my point of view to the UX team and many times we manage to agree on certain aspects.

Blue Alba • Financial Industry
Full Stack Developer May, 2021 - Jun 2022
The application is related to financial services and investment funds, developed in Node.js with GraphQL and REST, the frontend with React/Redux and Styled Components, Postgre and Snowflake databases. The application was made with micro frontends architecture, basically 2 one microfrontend for Deals and another for Funds, I developed features for those two applications.
I have a general knowledge of that architecture.

Globant • Sistemas Globales
UI Engineer Jul, 2019 - May, 2021
-Working for Deloitte account in a large application developed with Angular 8, Less, RxJS, and .NET, fixing bugs, and managing issues and user stories.

-Working for Ernst and Young (E&Y) account.
The project was developed in React.js with Typescript and Ant Design and has an integration with PowerApps.

BeeReal • Software Development & UX Design
Full Stack Developer Jan, 2018 - Jul, 2019
I have worked with different projects for DHL, most of them with Node.js and ExpressJS at the backend with Mongo DB/MySQL depending on the project, and with Angular 8, Bootstrap, and SCSS. I was in charge of developing new features, fixing bugs, and implementing client requirements. Working with REST architecture, my daily work was based on REST APIs, from the backend designed and sent to the frontend endpoint.

Estudio DIT • Web Design
Lead Designer 2016 - 2018
Designed and developed landing websites. Developed an electronic invoice website in collaboration with a Si Factura company. Developed a demo landing page for Buenos Aires City Government.
